World Series
Cast Iron Range
Frames 80 – 355

The W cast iron motor range offers products with outputs from as low as 0.75kW to 400kW in frame sizes 80 to 355L.

They are used within a diverse multi faceted range of applications from food and drink to quarry and heavy industry, pump, roller table drives to refrigeration and marine.

Many applications often have adverse operating conditions including repeated starting and occasional overloading; the W cast iron range is well suited to these situations.

A virtual go anywhere motor, this cast iron range has a full 3-year guarantee.
